

Modules

Please feel free to be creative about the modules and implementation.

Project Repo: <https://github.com/xurror/covider>

REGISTRATION MODULE - Group1, Group5, Group11

(<https://github.com/xurror/covider/tree/registration-module>)

Part 1(Logging In)

- This module handles user's registration of the system.
- The various users include Users and agents.
- ** User location of residence.
- ** ID card number.

Part 2 (Medical Information / Relatives Information) - Users only

- Collect some other basic user information that we will display on the user profile and store on the DB.
- Information like:
 - Users will have to specify their Covid19 details along with those of their family members during registration.
 - Last visited area(City for example)
 - Others ...

PROFILE MODULE - Group3, Group7

(<https://github.com/xurror/covider/tree/profile-module>)

- Basically sign in/authenticate a user in the system.
- Display users and their basic information.
- Update user info.
- Sign out.

DISTRIBUTION AND ALLOCATION MODULE - Group2, Group6, Group8

(<https://github.com/xurror/covider/tree/distribution-module>)

- This module will be responsible for handling the allocation and distribution of the food items created by the government
- Track location of Users during distribution.
- Follow up on users and their possible interaction with highly infected zones.

ADMIN MODULE - Group4, Group9, Group10

(<https://github.com/xurror/covider/tree/admin-module>)

- Map of distribution of users.
- Dashboard on food/goods distribution.
- Assigning field agents.
